NAXOS

Raku

In the Raku series, Naxos has created an eclectic grouping of products with each design presented in the color that looks best. The final effect is a series of unique products, just like the Raku ware that inspired it. The surface texture mimics the random irregularities observed in the refractory clay used by ceramic artists. The glazes – particularly on the structured fields – play with light by contrasting reflective lustre glazes with a muted matte base. While this series is a collection of unique items, they are also designed to coordinate with each other, just as a set of Raku pottery would be made up of different but complementary pieces.

Colors are intended as a guide only and may vary from actual tile. Sizes listed are nominal. Please check samples before making final selection and to get actual dimensions for layout. See reverse side for additional product information.

Silvery (NSRUSY/1024)

Black Clay (NSRUBC/1024)

*Sulphate (NSRUSE/1024)

10 x 24 Plain: Non-Rectified

Black Clay (Black) NSRUBC/1024

Silvery (White) NSRUSY/1024

*Sulphate (Peacock) NSRUSE/1024

* Please note that the Sulphate color is available in the Plain 10x24 field only. It is also different from the other colors in that it has a unique, feathery graphic.

10 x 24 Structures: Non-Rectified

Chic Black Clay NSRUBC/1024C

Chic Silvery NSRUSY/1024C

Symbol Turquoise NSRUTE/1024S

Care should be taken when installing the Chic to have the wave pattern align from piece to piece to create a continuous flow. The orientation of the pattern should also be the same in every row.

Installation Information

We recommend installing the Raku series with a stacked/straight joint. The minimum grout joint recommended is 3/32". Raku is intended for interior walls. If installing with a cement-based adhesive, we recommend using a flexible setting material. All substrates should be properly reinforced to be sure there is no movement. Wood studs need to be dry and properly braced with a minimum depth of 3". For mortar installations, the mortar bed has to be cured (less than 2% humidity) and has to have proper reinforcing. Extra care should be taken when grouting structured tile (especially Chic & Symbol). It is best to do small areas at a time, not letting the grout set too long, and then making sure that all excess grout is removed when washing so that the underlying patterns are completely visible. It is recommended to use a grout release and to avoid using contrasting grout colors, and it should be noted that some grout may remain in the surface indentations.

Chic Silvery (NSRUSY/1024C)

Chic Black Clay (NSRUBC/1024C)

Symbol Turquoise (NSRUTE/1024S)

(2 designs are mixed and sold randomly.)

Orders may not include equal quantities of each design.)

Coordinating Trim:

Expect variation in color and size between field and trims.

1/2 x 10 Miter Bullnose
